

Spherical Roller Bearing

Single Row Sealed Series-SB-22218-W33-SS

WUXI GUANGQIANG BEARING TRADE CO.,LTD

رقم تحمل	SB-22218-W33-SS
الأبعاد الرئيسية (مم)	
	90
	160
	40
الوزن (كجم)	3.7

It is sealed single row spherical roller bearing. Single-row of large rollers result in increased dynamic load capacity and up to 100% greater misalignment of conventional double row spherical roller bearings. Sealing features are combined with the lip-wiping sealing function of an added contact seal, for applications where contamination conditions are particularly severe or where substantial amounts of moisture are present.
